

ClearSight Quick Start Guide (v1.0)

Purpose

ClearSight is an internal production traceability tool that tracks boards from start to finish with full accountability.

Getting Started

1. Open your browser and navigate to the ClearSight server address.
2. Login with your assigned credentials.
3. Select your role (Operator, QC, Tester, Floor Manager).

Creating a New Board

1. Scan or enter the SKU.
2. System generates a unique serial number.
3. Board is added to the Soldering Station queue.

Moving Boards

1. Scan the board's serial number.
2. Choose 'Move to Next Stage'.
3. Confirm to update location and timestamp.

Handling Rework

If a board fails QC or testing:

1. Mark as 'Rework Required'.
2. Send back to soldering station.
3. Re-test after fix.

Floor Manager View

Provides live stage counts, operator productivity, and ERP-linked data.

Support

For help, contact IT desk or use the Help menu in ClearSight.
